Alexander Gutheil

Kassel, Germany | gutisalex@gmail.com | guddis.dev | linkedin.com/in/alexander-gutheil-0762a0166

Professional Summary

Senior Frontend Developer with 6+ years of focused experience building high-performance web and mobile applications, backed by a diverse technical background spanning system administration and 3D/VR development. Expert in Vue.js and Nuxt.js with extensive experience in React and modern JavaScript frameworks. Proven track record of leading frontend teams and delivering enterprise-level solutions. Specialized in CMS migrations, performance optimization, and modern meta-frameworks. Currently leading frontend teams at brandung GmbH, successfully delivering large-scale migrations and platform modernizations.

Experience

Senior Frontend Developer, brandung GmbH – Cologne, Germany   Jan 2025 – Present

- Continue leading the Deutsche Glasfaser frontend team, driving technical decisions and architecture evolution for the ongoing platform modernization
- Lead an external agency team working on the relaunch of the Deutsche Glasfaser checkout system, conducting code reviews and ensuring code quality and architectural consistency
- Mentor team members and establish development best practices

Frontend Developer, brandung GmbH – Cologne, Germany   Jan 2021 – Dec 2024

- Led the frontend team for the Deutsche Glasfaser GmbH relaunch (May 2023 – Present), a major enterprise project migrating from TYPO3 to Next.js with Contentful CMS
- Architected and implemented the complete frontend solution, initially using Next.js (App Router) and TypeScript
- Successfully migrated the platform to Next.js 16 and React 19, ensuring seamless transition and improved performance
- Integrated Contentful CMS via GraphQL with automated type generation for type-safe content management
- Implemented testing strategy with Playwright for end-to-end tests, Vitest for unit tests, and Storybook for component testing
- Implemented performance optimizations including Redis caching, image optimization, and bundle analysis
- Delivered a modern, scalable platform serving enterprise-level traffic with significantly improved performance and developer experience
- Managed the technical migration strategy and coordinated with cross-functional teams throughout the project lifecycle
- Contributed to multiple Nuxt.js relaunch projects including 1. FC Köln and About You, gaining extensive expertise in Vue.js ecosystem and headless CMS integrations
- Developed and maintained high-performance web applications using React, Next.js, and Vue.js frameworks
- Architected scalable frontend solutions using modern meta-frameworks (Next.js, Nuxt.js) and headless CMS platforms (Contentful, Storyblok, Scayle)
- Optimized application performance and user experience, implementing best practices for responsive design with Tailwind CSS

Frontend Developer (Co-Founder), Zazmo GmbH – Kassel, Germany   Feb 2019 – Jan 2021

- Co-founded startup focused on innovative group payment solutions, securing EXIST founder scholarship for first-year funding

- Achieved 2nd place in Hessian Founder Prize and 3rd place in Nordhessen Promotion Competition

- Designed and developed a web application for group payment processing from concept to production

- Built the frontend architecture using Vue.js, ensuring scalability and maintainability

- Integrated third-party services and APIs including Stripe and Usercentrics

- Delivered pilot project for Stadtwerke Kassel AG, which remains in active production use

- Collaborated with stakeholders to conceptualize and implement digital business processes

- Delivered a production-ready application meeting performance and security requirements

Software Developer, VirtuaTec – Kassel, Germany   Sept 2014 – Feb 2019

- Developed innovative 3D applications using Unity 3D for automotive simulation environments and HMIs

- Created immersive Virtual Reality experiences for automotive applications

- Designed and implemented 3D models using Maya

- Programmed application logic in C# using Microsoft Visual Studio

- Collaborated on storyboard development and virtual world creation

- Delivered cutting-edge solutions for automotive industry clients

System Administrator, IT Service und Beratung – Kassel, Germany   June 2006 – Sept 2014

- Managed and maintained Windows and Linux server environments

- Diagnosed and resolved complex IT issues in client and server environments

- Created and maintained system documentation and project requirements

- Ensured reliable IT infrastructure for business operations

- Provided technical support and troubleshooting for clients

Web Designer (Freelance), Self-Employed – Kassel, Germany   Aug 2003 – June 2006

- Designed and developed custom websites for various clients

- Worked with content management systems including WordPress

- Implemented SEO best practices to improve client website visibility

- Managed client relationships and project delivery
